- **Check your oil. Oil surge is common and can wreck your engine. Add half a litre extra to make sure**
- **Check your water level.**
- **Check your brake pads and brake fluid. Road compounds can get destroyed very quickly and old brake fluid can boil causing brake fade or brake failure. Roll your car back and forth to stop the pads sticking to the rotors when cooling off.**
- **Open your bonnet after each run to release engine-bay heat build-up.**
- **BREATHE! It gets exciting and stressful in the hot seat but try to breathe normally. It will help you drive better!**
